Internship Logbook

Instruction:
Student is required to record the daily internship activities, learning and experience using this logbook. At the end of each week, the Industrial Supervisor needs to review the logbook and verify it. The completed logbooks must be submitted together with the internship reports.

Student Name	**Chungu Muloshi**
Student ID	**TP065813**
Company Name	**Yamfumu**

Week: 5	**Start Date: 26/08/24**	**End Date: 30/08/24**
Type (s) & Objective(s) of the Activities: **Defining/Redefining the Project Models**		
Content: Please describe the technical and non-technical knowledge, skills, and experiences developed. Relate the relevance for future career.		

Content

- **Continued making correction/redefining models which I had modified in the previous week. Created relationships between the classes in the models and successfully managed to complete and get back on the right path. Improving my accuracy in defining models**
- **Debugged migration errors that were encountered from modifying the models of the system. The constant debugging of migration errors has allowed me to improve troubleshooting and resolve issues related to the database.**
- **Began trying to implement Qr code generation which is one of the functionalities of the ZABS system. Which is done by import the Qr code library and integrating it with Django**
- **Debugged import errors encountered in the process of the Qr code generation.**

Week: 6	**Start Date: 02/09/24**	**End Date: 06/09/24**
Type (s) & Objective(s) of the Activities: **Implement Qr code generation/test models/ start Graphql**		
Content: Please describe the technical and non-technical knowledge, skills, and experiences developed. Relate the relevance for future career.		
Content **Completed the implementation of the Qr code generation functionality of the ZABS system. This boosted my knowledge on how to implement qrcode in code.** **Made more modifications to models' fields after making some reconsiderations.** **Tested the models using Django's admin interface and made corrections on some errors.** **Began working on the Grapql part, defined the Grapql types by mapping the Django models to the Grapql types.**

Week: 7	**Start Date: 09/09/24**	**End Date: 13/09/24**
Type (s) & Objective(s) of the Activities: **Link Qr code to URL/test models/ Continue Graphql**		
Content: Please describe the technical and non-technical knowledge, skills, and experiences developed. Relate the relevance for future career.		
Content **Began attempting to link the qrcode to a URL that it will be directed to once scanned by implementing the necessary code for it.** **Continued testing the models using Django's admin interface and made corrections on some errors.** **Continued working on the Grapql part, defined the Grapql queries and mutations by implementing the necessary code for it.** **Was giving a small and short demonstration on how Django projects are deployed on to virtual private server (VPS) when ready for production use. Allowing me to grasp how projects get deployed for real-word use.**
